THE HEALTHY MINDS STUDY (HMS): 2024-25 ACADEMIC YEAR STUDENT SURVEY CODEBOOK

MENU OF MODULES:

***Standard Modules*[1]**	**Page Number**
(1) Demographics	5-13
(2) Mental Health Status	14-24
(3) Mental Health Service Utilization/Help-Seeking	25-37
***Elective Modules*[2]**	
(4) Substance Use	38-42
(5) Eating and Body Image	43-47
(6) Assault and Abuse	48-52
(7) Overall Health	53-56
(8) Knowledge and Attitudes about Mental Health and Mental Health Services	57-59
(9) Upstander/Bystander Behaviors	60-62
(10) Mental Health Climate	63
(11) Climate for Diversity and Inclusion	64-69
(12) Academic Persistence, Retention, and Competition	70-74
(13) Resilience and Coping	75
(14) Financial Stress	76-77
(15) Student Athletes	78-79
(16) Peer Support	80-85
(17) Public Safety and Policing	86-89
(18) Knowledge and Attitudes about Artificial Intelligence	90-94
(19) Black College Student Mental Health Module	95-99
***Special Modules*[3]**	
(20) MHICC Module	100-111
***Institutional Characteristics*[4]**	
(21) Institutional Characteristics	112-113

Notes:

[1] Standard modules are fielded at all participating institutions. The standard modules include a limited number of questions spanning the majority of the elective module topics, in addition to providing rich data on participants' demographics, mental health status, and help-seeking behaviors.

[2] Elective modules are chosen by participating institutions from the options listed above. To ensure that the overall survey (*standard modules+elective modules*) remains reasonable in length, participating institutions typically choose 1 elective module per survey (*schools may have multiple surveys sent to different randomly or non-randomly chosen subsamples*).

[3] Special modules are those given to schools that register for HMS through a special cohort. The United Negro College Fund (UNCF)/Steve Fund Module contains questions adapted/developed specifically for students at Historically Black Colleges and Universities (HBCUs) and Predominantly Black Institutions (PBIs), in partnership with the UNCF and Steve Fund. The questions are a combination of questions from HMS, questions adapted from the existing UNCF/Steve Fund questionnaire, created by the UNCF and Steve Fund team specifically for this module, and adapted from other sources. The MHICC module, developed with Mental Health Improvement through Community Colleges (MHICC; PI: Dr. Shawna Smith; HUM00193791) will be given to participants at schools that have enrolled with Healthy Minds as a part of the MHICC Cohort, and the questions were adapted/developed for students at Community Colleges.

[4] Public datasets now include institutional characteristics such as size, institution type, public/private status, geographic region, specialty, and graduation rate to facilitate the study of research questions that look at mental health through a lens of institutional environment.

ABOUT THIS DOCUMENT:

Contents:

This document outlines all survey items included in the HMS Student Survey, the variable names in the clean datasets, the Qualtrics variable names in the raw dataset (provided to schools upon request), as well as the coding.

Each module is presented within a table. Above each table is the module name (in all capital letters, bolded and underlined). The columns are as follows:

1. Section: outlines organization within the module and is not visible to participants within the survey
2. Variable Name (Q#): the variable names in your clean dataset, as well as the Qualtrics variable names in parentheses (found in raw datasets)
3. Item: the question text that participants see
    a. In cases of matrix table questions in which the variable names do not indicate what statement is being responded to, the corresponding number will appear ahead of the statement (For example: QPolicing_14_6, a matrix table statement where students are ask to rate to what degree they agree or disagree, the corresponding statement will read "6 Having armed police officers on campus is good for my mental health")
4. Response categories:
    a. Response categories for single select multiple choice questions (and their corresponding codes)
    b. Indication that a Qualtrics question is split into multiple columns of binary indicator variables (0 or 1) that indicate if a response among the multi-select responses was selected (1) or not (0)
        i. In cases where the indicator variable name does not correspond to text of the selected choice, the corresponding number will appear ahead of the response choice (For example: Peer10 is split into 4 variables (Peer10_1 through Peer10_4), so the first choice in the "Item" column will read "1 One-to-one peer support for academic concerns (e.g. peer advising)"
5. Skip Logic/Notes: Additional information if a question utilizes skip logic (changing the standard denominator of "all survey respondents") or conditions under which a question appears (See Color Coding below). This column also includes citation information when applicable.

Color Coding:

As noted above, some items are based on embedded skip logic within the survey (i.e., some measures are assessed only for participants with certain responses to survey items). For example, only those who respond "No" to the question "Are you a United States citizen (or permanent resident)?" are asked the follow-up question "What is your country of citizenship (passport country)?". This follow-up question is shown in gray, indicating that the item is based on embedded skip logic.

HMS is a web-based survey. As such, there are numerous coding and programming decisions (*the vast majority of which are rather boring so we'll spare you*). A few are important: for example, many items allow participants to "Select all that apply". In some cases, one of the response options is 'mutually exclusive' meaning that a participant who selects that response option cannot select any of the other options (e.g., the response category "None" is mutually exclusive for the item "What activities do you currently participate in at your school?"). Programming notes are included in blue within the module tables.

Certain items include a note in red (in the 'Citation/Notes' column) indicating that the item is included only if the elective module on that topic is not selected. In other words, a small number of items about important topics are included even if the elective module on that topic is not selected. This ensures that institutions have basic information about important topics that are not selected for in-depth assessment through elective modules. For example, if an institution does not select the 'Eating and Body Image' module, a small number of items about eating and body image are included in the 'Mental Health Status' module. If an institution does select the 'Eating and Body Image' module, the items about eating and body image are not included in the 'Mental Health Status' module (because eating and body image are being assessed separately in more detail through the 'Eating and Body Image' module).

When the "Response Categories" column contains this green note: "Binary Variables (1=selected, 0=unselected)", it is an indication that a multi-select question is split into multiple columns in the data (i.e. binary indicator variables for each response option). For more information, see "Contents" above (item 4b).

ITEM BASED ON EMBEDDED SKIP LOGIC
LOGISTIC/PROGRAMMING NOTES
ITEM INCLUDED IF ELECTIVE MODULE ON THAT TOPIC NOT SELECTED
ITEM SPLIT INTO MULTIPLE BINARY INDICATOR VARIABLES
RANDOMIZED (ONLY ASKED OF ~50% OF STUDENTS AT EACH SCHOOL)

Non-Response Analysis & Weighting:

A potential concern in any survey study is that those who respond to the survey will not be fully representative of the population from which they are drawn. In the HMS, we can be confident that those who are invited to fill out the survey are representative of the full student population because these students are randomly selected from the full list of currently enrolled students. However it is still possible that those who actually complete the survey are different in important ways from those who do not complete the survey. It is important to raise the question of whether the percentage of students who participated are different in important ways from those who did not participate. We address this issue by constructing non-response weights. The non-response weights adjust specifically for the fact that female students have consistently higher response rates than male students in our survey (and in most other survey studies). We construct the weights by comparing the female-male composition of our respondent sample to the reported female-male ratio for the full student population at each institution (which is typically available from basic enrollment statistics). If the respondent sample has a smaller percentage of males and larger percentage of females, as compared to the composition of the full student population, then male students in our sample are assigned a higher non-response weight value than female students. This means that weighted estimates are representative of the female-male distribution in the full student population. For students with nonbinary gender identities, we are not able to use this same process, however, because we are generally not able to obtain accurate statistics on the representation of these groups in the full student population. Therefore, rather than making assumptions, we assign a weight value to students with nonbinary identities that leaves their representation in the weighted sample the same as in the unweighted sample. In the future, if and when more reliable information becomes available at the full student population level, we will be able to incorporate that information into sample weights for groups other than female and male gender identities. Finally, note that these sample weights give equal aggregate weight to each school in the national estimates. An alternative would have been to assign weights in proportion to school size, but we decided that we did not want our overall national estimates to be dominated by schools in our sample with very large enrollments. The final survey weight variable incorporating these calculations is titled “nrweight.”

(18) KNOWLEDGE AND ATTITUDES ABOUT ARTIFICIAL INTELLIGENCE

This module aims to gather your knowledge of and opinions about Artificial Intelligence (AI).

SECTION	VARIABLE NAME/Q#	ITEM	RESPONSE CATEGORIES	SKIP LOGIC/NOTES
	AI_1	Artificial intelligence (AI) is designed to learn tasks that humans typically do, for instance recognizing speech or pictures. How much do you know about AI?	1=A lot 2=A little 3=Nothing at all 4=No answer	
	AI_2	On average, how often do you think you interact with AI? By "interact with AI," we mean indirectly using AI through apps/websites that have integrated AI into their systems - not if you use Ai such as ChatGPT, Bard, AlphaCode, Dall-E, etc.	1=Almost constantly 2=Several times a day 3=About once a day 4=Several times a week 5=Less often than several times a week 6=Never 7=No answer	
	AI_3	We want to understand how people are using widely available artificial intelligence tools. In an average week, how often do you intentionally use generative AI (e.g., ChatGPT, Bard, AlphaCode, Dall-E, etc.)?	1=Almost constantly 2=Several times a day 3=About once a day 4=Several times a week 5=Less often than several times a week 6=Never 7=No answer	
	AI_4_1 AI_4_2 AI_4_3 AI_4_4 AI_4_9 AI_4_6 AI_4_7 AI_4_8 AI_4_10 AI_4_10_TEXT	Please remember that your responses are confidential. How frequently have you used generative AI (such as ChatGPT, Bard, AlphaCode, Dall-E, etc.) for the following: 1 Academic-related matters that have not been explicitly forbidden within your institution 2 On academic-related matters which have explicitly been forbidden within your Institution 3 For non-academic related work 4 For personal communications (e.g., messages to friends, family)	1=Almost constantly 2=Several times a day 3=About once a day 4=Several times a week 5=Less often than several times a week 6=Never 7=No answer	

		9 For matters related to physical health problems (e.g., weight loss, identifying physical symptoms of sickness, etc.) 6 For matters related to mental health (e.g., identifying symptoms, ideas for treatment, etc.) 7 For matters related to companionship (e.g., when feeling lonely) 8 To create materials such as text, images, or videos for fun 10 Other (please specify)		
	AI_5_1 AI_5_2 AI_5_3 AI_5_4 AI_5_5 AI_5_6	Regardless if you have used generative Ai for the following reasons, **how trustworthy** do you think information or advice from generative Ai like ChatGPT is regarding... 1 ...information on physical health matters 2 ...decisions about physical health 3 ...information on mental health matters 4 ...decisions on mental health 5 ...information on political or social matters 6 ...decisions about political or social matters	1=Very trustworthy 2=Trustworthy 3=Untrustworthy 4=Very untrustworthy	
	AI_6	How important is it for higher education institutions to incorporate AI education into the curriculum?	1=Very important 2=Somewhat important 3=Somewhat unimportant 4=Very unimportant	
	AI_7	Which of the following is the most important for higher education institutions to teach students when preparing them for AI and their careers?	1=Teach the ethics of using AI 2=Prioritize teaching core skills (critical thinking, problem-solving, etc.) for AI use and their applications 3=Teach the practical applications of AI 4=Encourage careers that are less likely to be impacted by AI 5=None of the above	
	AI_8_1 AI_8_2 AI_8_3 AI_8_4	How satisfied are you with your school's instruction on... 1 ...basic functions of AI and how to use AI applications? 2 ...applying AI knowledge, concepts, and applications in different scenarios? 3 ...higher-order thinking skills (e.g., evaluate, appraise, predict, design) with AI applications? 4 ...human-centered considerations (e.g., fairness, accountability, transparency, ethics, safety)?	1=Very satisfied 2=Somewhat satisfied 3=Neither satisfied nor dissatisfied 4=Somewhat dissatisfied 5=Very dissatisfied 6=Don't know 7=Not available at my school	

	AI_9	How much has the rise of artificial intelligence influenced what you are studying or plan to study in college?	1=A lot 2=Somewhat 3=A little 4=Not at all	
	AI_10	How much has the rise of artificial intelligence influenced your intended career or career plans?	1=A lot 2=Somewhat 3=A little 4=Not at all	
	AI_11	Thinking about the impact of generative AI on the future of education, which of the following comes closest to your view, even if neither is exactly right?	1=Teachers should focus more on detecting cheating with generative AI so students can learn to think critically on their own 2=Teachers should focus more on incorporating generative AI into the classroom so students can learn to harness the tools to their full potential 3=Don't know/No opinion	
	AI_12_1 AI_12_2 AI_12_3 AI_12_4 AI_12_5 AI_12_6	How much of a role, if at all, has AI played in each of the following in the U.S.? 1 Spread of misinformation 2 Loss of trust in elections 3 Political polarization 4 Loss of trust in institutions 5 Threats to democracy 6 Distrust in vaccines	1=A large role 2=A moderate role 3=Don’t know/No opinion 4=A small role 5=No role at all	
	AI_13	We are interested in what people know off the top of their head about artificial intelligence (AI). You may find some of these questions easy and others difficult. (If you don’t know the answer, select “Not sure.”) Thinking about customer service, which of the following uses artificial intelligence (AI)?	1=A chatbot that immediately answers customer questions 2=An online survey sent to customers that allows them to provide feedback 3=A contact page with a form available to customers to provide feedback 4=A detailed Frequently Asked Questions webpage 5=Not sure	

	AI_14	When playing music, which of the following uses artificial intelligence (AI)?	1=Using Bluetooth to connect to wireless speakers 2=A playlist recommendation 3=A wireless internet connection to stream the music 4=Shuffle play from a chosen playlist 5=Not sure	
	AI_15	When using email, which of the following uses artificial intelligence (AI)?	1=The email service marking an email as read after the user opens it 2=The email service allowing the user to schedule an email to send at a specific time in the future 3=The email service categorizing an email as spam 4=The email service sorting emails by time and date 5=Not sure	
	AI_16	Thinking about health products, which of the following uses artificial intelligence (AI)?	1=Wearable fitness trackers that analyze exercise and sleeping patterns 2=Thermometers that are placed under someone's tongue to detect a fever 3=At-home COVID-19 tests 4=Pulse oximeters that measure a person's oxygen level of the blood 5=Not sure	
	AI_17	Thinking about online shopping, which of the following uses artificial intelligence (AI)?	1=Storage of account information, such as shipping addresses 2=Records of previous purchases 3=Product recommendations based on previous purchases 4=Product reviews from other customers 5=Not sure	
	AI_18	Thinking about devices in the home, which of the following uses artificial intelligence (AI)?	1=Programming a home thermostat to change temperatures at certain times 2=A security camera that sends an alert when there is an unrecognized person at the door 3=Programming a timer to control when lights in a home turn on and off 4=An indicator light that turns red when a water filter needs to be replaced 5=Not sure	

	AI_19	In your opinion, what type of effect will artificial intelligence have on the total number of jobs in the United States in the next 10 years?	1=Increase the total number of jobs 2=Have no impact on the total number of jobs 3=Reduce the total number of jobs	
	AI_20	Overall, would you say the increased use of artificial intelligence (AI) in daily life makes you feel:	1=More excited than concerned 2=Equally concerned and excited 3=More concerned than excited 4=No answer	
	AI_21_1 AI_21_2 AI_21_3 AI_21_4 AI_21_5 AI_21_6 AI_21_7 AI_21_8	Do you think artificial intelligence (AI) is doing more to help or hurt each of the following: 1 People finding accurate, unbiased information online 2 People taking care of their health 3 Police maintaining public safety 4 Doctors providing quality care to patients 5 Judges making fair sentencing recommendations for individuals convicted of a crime 6 Content moderation on social media 7 Students learning materials 8 Students' academic performance	1=AI helps more than it hurts 2=AI hurts more than it helps 3=Not sure 4=No answer	
	AI_22_1 AI_22_2 AI_22_3 AI_22_4 AI_22_5 AI_22_6 AI_22_7 AI_22_8 AI_22_9 AI_22_10	How much do you trust or distrust each of the following to use AI responsibly? 1 The U.S. military 2 Law enforcement 3 Healthcare organizations 4 Higher education institutions 5 Financial institutions 6 The news media 7 The U.S. civilian government 8 Social media companies 9 U.S. corporations 10 Political organizations	1=Trust a lot 2=Trust somewhat 3=Don’t know/No opinion 4=Distrust somewhat 5=Distrust a lot	

(19) BLACK COLLEGE STUDENT MENTAL HEALTH MODULE

(20) MHICC MODULE

This survey module is intended to understand the mental health needs and experiences specific to community college students.

This module was developed by the Mental Health Improvement through Community Colleges (MHICC) study at the University of Michigan School of Public Health (PI: Dr. Shawna Smith; HUM00193791). Answers will be used by the MHICC study team to better understand the current mental health resources at your school as well as preferences students have for seeking mental health support.

Vignette 1	MHICC_vign1_1 MHICC_vign1_2 MHICC_vign1_3 MHICC_vign1_4 MHICC_vign1_5	**Mood Tracking App** Your college provides access to a mobile application ("app") that can be accessed for free on personal mobile devices. The app provides a daily survey to assess your mood and also provides suggestions for improving your mood (e.g., taking a walk, trying to meditate). All students can access the app, regardless of mental health need, and no mental health professionals or other administrators at your college are involved or have access to your mood or other data. Please answer the following questions based on this resource: 1. This resource is appealing to me. 2. This resource seems like a good match for the students at my college. 3. This resource seems feasible for my college to provide. 4. This resource seems likely to be effective at improving student mental health at my college 5. I would use this resource.	1=Strongly disagree 2=Disagree 3=Neither agree nor disagree 4=Agree 5=Strongly aAgree 6=Unsure	
Vignette 2	MHICC_vign2_1 MHICC_vign2_2 MHICC_vign2_3 MHICC_vign2_4 MHICC_vign2_5	**Campus Mental Health Resources Portal** Your college provides access to a free web-based portal that connects students with information on available mental health resources, both on campus and in surrounding communities. This includes information on local mental health service providers, including services they offer, how to schedule or request appointments, typical wait times, cost, and payments or insurance types accepted. Students are also able to request counseling appointments with mental health professionals at their college directly through the portal. The portal can be accessed by all students via the web or through a mobile app on their personal electronic devices. No mental health professionals or other administrators at your college have access to data related to your portal usage. Please answer the following questions based on this resource: 1. This resource is appealing to me. 2. This resource seems like a good match for the students at my college. 3. This resource seems feasible for my college to provide. 4. Vignette 3	MHICC_vign3_1 MHICC_vign3_2 MHICC_vign3_3 MHICC_vign3_4 MHICC_vign3_5	**Peer Support Community Forum** Your college provides access to a peer support mobile application ("app") that you can use for free on your personal electronic devices. The app allows students to participate in an anonymous peer-to-peer support community forum, where other students can offer advice or support to students in need. This can include	1=Strongly disagree 2=Disagree 3=Neither agree nor disagree 4=Agree 5=Strongly aAgree 6=Unsure	

		support for issues related to mental health, as well as academic and other personal support needs. The community is moderated by licensed (but anonymous) mental health professionals that may or may not be affiliated with your college; these professionals oversee discussions but generally do not offer advice or support themselves. All students can access and participate in the anonymous community forum. No mental health professionals or other administrators at your college have access to data related to your engagement with the peer support community. Please answer the following questions based on this resource: 1. This resource is appealing to me. 2. This resource seems like a good match for the students at my college. 3. Vignette 4	MHICC_vign4_1 MHICC_vign4_2 MHICC_vign4_3 MHICC_vign4_4 MHICC_vign4_5	**Required Mental Health Seminar** Your college requires all students to complete a one-credit seminar during your first enrolled semester focused on managing your emotional and mental health. Course instructors are local licensed mental health professionals. Through the course, students are taught skills to manage their emotional and mental health, including mindfulness, conflict resolution, and building resilience. Evidence-based practices related to early intervention for students experiencing mental health challenges (e.g., self-screening for depression/anxiety, key tenets of Cognitive Behavioral Therapy [CBT]) are also covered. Students are also provided with information for accessing mental health resources on campus and/or in the community. Students receive credit for the course (thus are required to pay one credit hour of tuition for the course) and can opt to take the course for a letter grade or pass/fail. Please answer the following questions based on this resource: 1. This resource is appealing to me. 2. This resource seems like a good match for the students at my college. 3. Vignette 6a	MHICC_vign6_1 MHICC_vign6_2 MHICC_vign6_3 MHICC_vign6_4 MHICC_vign6_5	**Academic Department Counselors** Your college has counselors dedicated to students in each academic department. These counselors, who are distinct from academic advisors, are typically not licensed mental health professionals but are trained to provide support for both student mental health and academic needs. These counselors will have knowledge of the academic requirements for students in their department, and will know how to work with students to problem solve and come up with strategies to address mental health concerns that may be impacting a student's academic success. Academic counselors can also help connect students to other community or campus mental health resources, including dedicated academic advisors or mental health professionals. Counselors are available to meet in person or virtually. Appointments are free of charge, confidential, and available to students first-come, first-served. Please answer the following questions based on this resource: 1. This resource is appealing to me. 2. This resource seems like a good match for the students at my college. 3. This resource seems feasible for my college to provide. 4. This resource seems likely to be effective at improving student mental health at my college 5. All counseling sessions take place at the campus counseling office, which is conveniently located on campus and easily accessible. All counselors are licensed mental health professionals trained in evidence-based mental health practices. Counselors work with students to come up with a counseling plan best suited to their needs; typically students will meet with their counselor every two weeks for up to one semester. Following these initial sessions, students in need of longer-term counseling can be referred to counselors or therapists in the community. Insurance is not required, and cost of counseling is based on a sliding-scale for student income, with many students receiving it at no or low cost. Depending on need and counselor	1=Strongly disagree 2=Disagree 3=Neither agree nor disagree 4=Agree 5=Strongly aAgree 6=Unsure

Students can participate in their teletherapy appointments from any location via their personal electronic devices (e.g., computer, tablet, phone). All counselors are licensed mental health professionals trained in evidence-based mental health practices. Counselors work with students to come up with a teletherapy plan best suited to their needs; typically students will have a teletherapy appointment with their counselor every two weeks for up to one semester. Following these initial sessions, students in need of longer-term counseling can be referred to teletherapy or other counseling opportunities in the community. Insurance is not required, and cost of teletherapy is based on a sliding-scale for student income, with many students receiving it at no or low cost. Depending on need and counselor availability, there may be a waiting list for scheduling the first teletherapy appointment. Please answer the following questions based on this resource: 1. Vignette 9	MHICC_vign_9_1 MHICC_vign_9_2 MHICC_vign_9_3 MHICC_vign_9_4 MHICC_vign_9_5	**Virtual Health Care App** Your college offers access to a mobile application ("app") which provides 24/7 access to virtual medical care, at no cost, for physical and mental health needs, including health coaching, teletherapy, on-demand access to mental health counselors, and psychiatric care. In urgent or crisis situations, on-demand medical care and mental health counseling services connect students with the app-associated provider that can virtually meet with them the soonest, with an average wait time of 3-7 minutes. For non-urgent situations, students can book teletherapy appointments, which connect students with providers that can diagnose and treat both mental and physical health complaints. Mental health-focused teletherapy consists of scheduled 45 minute appointments with a licensed mental health provider who students can choose from a nationwide directory of providers. All care is free of charge for currently-enrolled students, with no insurance needed, and only psychiatric care requires a referral from another health care provider. Please answer the following questions based on this resource: 1. This resource is appealing to me. 2. This resource seems like a good match for the students at my college. 3. (21) INSTITUTIONAL CHARACTERISTICS

Institutional characteristics are variables collected so as to facilitate research involving mental health through a lens of institutional environment. These school-level variables are collected via the HMS enrollment form, school's websites, or other websites as needed (e.g., Carnegie Classifications, College Board) and are included in the public HMS datasets dating back to the 2017-2018 academic year.
